A55 FULL BULLNOSE	A56 BOOKEND	A57 SMALL OGEE	A58 MEDIUM OGEE	A59 CLASSIC

SOLID SURFACE ATTRIBUTES WAIVER

IMPORTANT

Please read the following attributes that will apply to the customer's kitchen countertop or vanity top:

■ COLOR

Dark or saturated Solid Surface colors are likely to show white surface scratches. The Customer should be aware of this condition and acknowledge that these colors may well require more maintenance than other Solid Surface colors.

■ VEINING

We are aware that certain Solid Surface colors have random veining, similar to marble and other natural products. We understand that due to the configuration of some countertops, seams may be required and changes in the veining may be noticeable. We have been shown the plan of our countertop/vanity indicating any seam locations (if required) and the grain direction. We are aware that veining in these areas may be different.

■ REFLECTIVE PARTICLES

We are aware that certain Solid Surface colors have a subtle directional pattern that is made up of reflective particles. As a result these "flakes", when viewed from different angles, can have a perceived color change or "disappear" even under a consistent light source. We understand that due to the configuration of our countertops seams may be required and changes in the directional pattern may be noticeable. We have been shown the plan of our countertops/vanity indicating any seam locations (if required) and any changes in pattern. We are aware that directional changes may be apparent.

■ POLISHED FINISHES

Polished high gloss or semi-gloss finishes applied to Solid Surface materials are likely to show white surface scratches and variations in finish over time (more than a matte finish). Dealer and customer should be aware of this condition and acknowledge that these finishes may require more maintenance than the standard matte finish.

Masco Cabinetry LLC will, at the owner's request, return at anytime to re-finish the countertops for a nominal service charge.

We understand and accept the conditions as stated above.
